**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. A review of this application reveals that it is a national stage application of PCT/JP00/08134, therefore it is PCT unity of invention practice rather than US restriction practice which is applicable to the instant claims. The delay in applying PCT unity of invention practice to the instant claims is regretted.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a steel cord.

Group II, claim(s) 5-8, drawn to a rubber-steel cord composite.

Group III, claim(s) 9-14, drawn to a radial tire reinforced with steel cords in the carcass.

Group IV, claim(s) 15-24, drawn to a motorcycle radial tire reinforced with steel cords in the belt.

Group V, claim(s) 25 and 26, drawn to a radial tire reinforced with steel cords in the belt reinforcing layer.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the subject matter of claim 1 common to all the inventions does not distinguish over the prior art, as evidenced by EP 0 790 349 A1 (see for example 2x0.33 + 6x0.33 steel cord made by twisting steel filaments having filament tensile strength of 2900 MPa (2900 N/mm<sup>2</sup>), steel cord has a total elongation at break of 5.64%, ratio of cord diameter to twisting pitch is 1.185mm/8mm=1.5) for example, and therefore the claim 1 subject matter cannot serve as a common special technical feature.

Art Unit 1733

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adrienne C. Johnstone whose telephone number is (571)272-1218. The examiner can normally be reached on Monday-Friday, 10:30AM-7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine Copenheaver can be reached on (571)272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
